

Our Company

Shenyang Huade High Technology Electric Co., Ltd. was established in 1992. It is a professional manufacturer of high voltage gas insulated metal closed switchgear with registered capital of 165 million RMB. The company covers an area of 100,000 square meters. The building area is 70,000 square meters, including fully enclosed purification plant, fully shielded high voltage laboratory. The company has world-class modern processing equipment, production lines and advanced detection methods: laser cutting and welding processing equipment imported from Germany, helium leak detection and gas filling equipment, silicone rubber automatic pressure gel production line, epoxy resin automatic pressure gel production line.

At present, the company mainly produces 72.5kV, 40.5KV, 12KV environment-friendly gas insulated metal enclosed switchgear (C-GIS) and 12KV gas-filled RMU switchgear, with an annual production capacity of over 5,000 sets.

Based on the corporate tenet of “taking science and technology as the guide and surviving on quality”, the company processes and manufactures strictly in accordance with ISO9001 quality management system standards, and develops and produces new high-tech, environment-friendly and intelligent products. The company's independently researched and developed ZHN3-72.5, HG3-40.5, HG4-10 C-GIS are the first in China and world leading high-tech environment friendly products, obtained a number of national patent certificates, and recognized by the China Institute of Environmental Sciences as environmental emission reduction products. The hospital identified as environmental protection and emission reduction products. The products have passed all type tests and national new product technical appraisal. Through the introduction of technology, the company has independently improved the 10KV dry air XGN118-12 RMU products.

Looking into the future, the company will continue to pursue the enterprise spirit of "being honest, pragmatic and innovative" and dedicated to the users to provide first-class products, quality

services,hand in handto make greater contributions to the development of the electric power industry.
